ASSEVERO

The word "Assevero" stems from an archaic Latin adverb meaning "to do or pursue earnestly; to assert strongly, to declare; to profess; and to be serious." ... and that is exactly what our partners and clients can expect from us:

Serious **SERVICE**
 Serious **INNOVATION**
 Serious **SECURITY**

MISSION

Our mission is to build our company's value by successfully helping our clients address their cyber security challenges through the thoughtful application of people, processes, and technology.

All of our long-term strategies, and short-term actions, will be molded by a set of core values that are shared by each and every consultant and employee.

SERVICE OFFERINGS

Assevero offers four cyber security solution sets designed to assist our clients perform more effectively. These solutions include:

- Cyber Security Recruiting
- Cyber Security Consulting
- Cyber Security Solutions
- Cyber Warfare Support

Our solutions are designed to benefit from the experience and expertise developed in support of the others; and to leverage a framework of common people, processes, and technology.

COMMITMENT

As suggested by our company tagline, Assevero is committed to providing serious service, serious innovation, and serious security to each of our partners and clients, and to establishing a diverse, professionally stimulating, and rewarding workplace for our employees and consultants.

PAST PERFORMANCE

We have provided cyber security support to a wide variety of end-user clients such as the Securities and Exchange Commission, the Department of Defense, the Government National Mortgage Association, and the Howard County Maryland government. We also support several commercial clients.

We're proud to note that our work frequently leads to accolades from our clients and repeat business and referrals from our partners. Assevero recently scored 95 out of 100 points on Dunn & Bradstreet's Open Ratings Client Past Performance Evaluation.

CYBER SECURITY CONSULTING

Assevero uses a traditional consulting model, with some modern twists, to engage the industry's best talent, and focus them on addressing our client's cyber security challenges. We leverage our organic experience, as well as our extensive access to hundreds of security professionals from within the United States.

Assevero offers cyber security consulting services related to all aspects of information assurance including:

- Security Management Practices
- Access Control Systems
- Security Architecture & Engineering
- Investigations and Forensics
- Statutory and Regulatory Compliance
- Networking Security
- Risk Assessment
- Operations Security
- Cryptography
- Disaster Recovery Planning

We specialize in system authorization (certification and accreditation) for national security systems; continuous monitoring, network security; FISMA compliance and reporting; security engineering, and related risk management framework activities.

CYBER SECURITY SOLUTIONS

Assevero is always searching for new technologies that promise to reduce the cyber security risks to our clients. Our cyber security solutions offerings are designed to help clients select and implement a variety of security devices and technologies to solve complex security issues.

We are a value added reseller for select information technology security products from industry leading manufacturers. We assist with client needs assessments and recommendations, resell security hardware and software products, and provide implementation assistance and post-sales support.

CYBER SECURITY RECRUITING

Assevero is a specialist in placing cyber security professionals, and has already become a market leader within the Baltimore and Washington metropolitan area. Our cyber security recruiting offering is designed to help our clients locate and recruit cyber security professionals for openings that have been difficult for them to fill using their own resources. We work closely with client hiring managers and internal recruiters to thoroughly understand the specific experiential, educational, skill set, security clearance, and temperament requirements for each job.

Assevero collects candidate résumés from many sources including other recruiters, job fairs, and our personal and professional network. We also gather résumés from visitors to our website, and we use résumé spiders and robots to find passive candidate résumés on personal web pages, corporate sites, professional associations, and social networks.

Some of the important features and benefits of this offering include our access to hundreds of online candidate sources, extensive domain expertise, access to unique and passive candidates, convenient client and candidate automation tools, and a cost effective and risk free fee structure.

CYBER WARFARE SUPPORT

Cyber warfare is Internet-based conflict which generally involves politically motivated attacks on information, or information systems, or both. Cyber warfare is usually sponsored by nation states and is frequently intended to disable official websites and networks, disrupt or disable essential services, steal or alter sensitive or classified data, and cripple infrastructure or financial systems.

Assevero is developing a cyber-warfare offering in support of emergent requirements at the U.S. Cyber Command recently established at Fort George G. Meade, MD.

Assevero is a veteran owned small business based in Annapolis, Maryland. We are a boutique provider of innovative cyber security and information assurance services to federal and commercial clients in the Baltimore and Washington metropolitan area. The company was founded to fill a niche as a junior partner to selected firms engaged in providing cyber security products and services to federal and state governments. Our partners run the gamut from small businesses with fewer than five employees to multinational corporations employing tens of thousands. **We'd like to be your cyber security partner too.**

SERIOUS SERVICE

Assevero has earned a reputation for excellence through sustained superior performance on behalf of our clients.

SERIOUS INNOVATION

Our virtual business structure, along with secure, cloud-based productivity, communications and collaboration platforms, promotes an agile and mobile workforce.

SERIOUS SECURITY

We are focused on cyber security. It's all that we do. Assevero doesn't diffuse our attention, or dilute our resources, across a wide range of services.

COMPETENCY

Assevero brings a thorough understanding of the information systems security domain, as well as specialized expertise in information systems security staffing, information warfare, and a wide range of cyber security issues and challenges.

The quality of our employees and consultants, and our reputation for sustained superior performance on behalf of our clients, sets us apart from our competitors.

QUALITY

Assevero believes that strong technical leadership, critical peer reviews, and collaborative technologies encourage innovation, promote teamwork, support knowledge sharing, and lead to quality performance. These elements form the core of our management approach. Delivering high quality services and exceptional business value is a primary goal at Assevero. We understand that our success is strictly measured by how well we deliver on our commitments and the quality of our deliverables.
