ABOUT ASSEVERO

Assevero is a Veteran-owned small business based in Annapolis, Maryland. We are a boutique provider of innovative cyber-security and information-assurance services to federal and commercial clients in the National Capitol region. True to our tagline, we are committed to providing serious service, serious innovation and serious security to our partners and clients, and to establishing a diverse, professionally stimulating and rewarding workplace for our employees and consultants.

Assevero offers four cyber security solution sets designed to assist our clients to perform more effectively. These solutions include cyber security recruiting, cyber security consulting, cyber security solutions and cyber warfare support. Our solutions benefit from the experience and expertise developed in support of others, and leverages a framework of common people, processes and technology.

The company was founded to fill a niche as a partner to selected firms engaged in providing cyber security products and services to federal and state governments. Our partners range from small businesses with fewer than five employees to multinational corporations employing tens of thousands.

We'd like to be your cyber-security partner too.

CAPABILITIES

Assevero offers cyber security consulting services across all aspects of information assurance, including: information security management practices; assessment of control systems; networking and telecommunications; cryptography; security architecture engineering; operations security; applications security and systems development; business continuity and disaster recovery planning; compliance; forensics; investigations and security ethics.

We specialize in system authorization (certification and accreditation) for national security systems, continuous monitoring, network security, FISMA compliance and reporting, security engineering, and related risk-management framework activities.

We are a specialist in placing cyber security professionals, and have already become a market leader within the Baltimore and Washington metropolitan area. Our cyber-security recruiting offering is designed to help our clients locate and recruit cyber security professionals for openings that have been difficult for them to fill using their own resources. Assevero stays current on emerging technologies that promise to reduce cyber-security risks to our clients. Our cyber-security solutions are designed to help clients select and implement a variety of security devices and technologies to solve complex security issues.

ASSEVERO SEAPORT-E TEAMMATES

Assevero seeks the best when adding to our SeaPort-e Team. These outstanding small businesses have been selected through a rigorous evaluation process, and offer specialized cyber-security expertise to augment and enhance Assevero's delivery of superior solutions to our SeaPort-e customers.

Secure Technologies, LLC is an 8(a), 8(m), Minority Woman Owned and Economically Disadvantaged Women Owned Business. They understand an active security approach is necessary to fully protect an organization's information infrastructure.

MANAGEMENT APPROACH

The Assevero SeaPort-e Team operates on the concept that strong technical leadership, critical peer reviews and collaborative technologies encourage innovation, promote teamwork, support knowledge sharing and result in quality performance. This is the core of our management approach.

Assevero Security Consulting, LLC was awarded SeaPort-e contract #N00178-12-D-6773 in Zone 2 (the National Capital Region) in the Summer of 2012. In concert with our outstanding small business teammates, Assevero stands ready to help Navy and Marine Corps clients address their most intractable cyber-security challenges.

PERFORMANCE

Our strong technical leadership promotes a safe and supportive environment in which technical professionals improve their own skills and ultimately the quality of service we provide to customers. Our project managers provide technical leadership, assign tasks, and review customer deliverables for quality.

Assevero uses the advanced Microsoft Office 365 suite for office automation, communications, and collaboration. That collaboration encourages innovation and teamwork, improves quality, and improves knowledge sharing. Additional investments in collaborative technologies, including web conferencing, online document processing and storage, and cloud computing, provide team members ready access to current data from any web-enabled device.

The word "Assevero" stems from the Latin adverb meaning "to do or pursue earnestly; to assert strongly, to declare; to profess; and to be serious." -- That is exactly what our partners and clients can expect:

SERIOUS SERVICE. SERIOUS INNOVATION. SERIOUS SECURITY™
